PRQA signs distribution agreement with Trinity Techologies covering Taiwan, China, Singapore, Malaysia and Vietnam

30 October 2014 / -- PRQA | Programming Research, a global leader in static analysis today announces they have signed a distribution agreement with Trinity Technologies covering Taiwan, China, Singapore, Malaysia and Vietnam.

Trinity Technologies provides technologies and services to help companies meet their required governance and regulatory compliance needs, improving overall project quality, security and reliability.

"Trinity Technologies is very excited to represent and distribute PRQA products throughout this region. We see a great fit for PRQA products with our customers' development and testing requirements," said Thomas Chen, CEO for Trinity Technologies.

Paul Blundell, PRQA's CEO said, "Extending our presence in this region is a important step forward for the PRQA; Trinity Technologies is a great partner, whose connections across the Asian market will help us quickly achieve growth throughout this region."

PRQA's industry-leading tools, QA·C, QA·C++ and QA·Verify, offer the closest possible examination of C and C++ code. All contain powerful, proprietary parsing engines combined with deep accurate dataflow which deliver high fidelity language analysis and comprehension. They identify problems caused by language usage that is dangerous, overly complex, non-portable or difficult to maintain. Plus, they provide a mechanism for coding standard enforcement.
